Understanding Occupational Titles

WHAT ARE OCCUPATIONAL PROGRAMMES?

Occupational qualifications are developed in line with the Quality Council for Trades and Occupations (QCTO) framework and are structured to support practical, outcomes-based learning. Each occupational programme is made up of the following components:

- **Knowledge Modules (KM):** These contain the theoretical content learners need to understand the concepts and context of their occupation. Our Knowledge Modules are professionally bound for easy reference and long-term use.
- **Practical Modules (PM):** These provide structured, hands-on activities that simulate workplace tasks in a training environment. They are supplied as pre-punched loose sheets for easy filing in a lever-arch or ring binder.
- **Workplace Modules (WM):** These outline the real-world tasks learners must complete at the workplace under supervision. Like the practical modules, they are provided as punched sheets for flexible organisation and tracking of learner progress.
- **Facilitator Guide (FG):** A guide for facilitators and trainers, containing lesson guidance, answers to activities, and internal assessment tools. The Facilitator Guide is also provided as pre-punched loose sheets for convenient filing and classroom use.

This flexible packaging format allows colleges and training providers to manage, customise, and file components as needed.
