The importance of sport in the life of a young student is invaluable and goes much further than the basic answer that 'it keeps children off the streets'. It does in fact keep children off the streets, but it also instils lessons that are essential in the life of a student athlete.

Sport plays a pivotal role in the make-up of a young athlete, especially in the high school years when student athletes are much more mature and mentally developed. Where else can a young, impressionable youth learn values like discipline, responsibility, self-confidence, sacrifice and accountability?

Television, which may be the most influential tool in the lives of young adults, does not show enough of these qualities, nor is it on the Internet or the radio. It is the responsibility of parents, teachers, sport teams, clubs and after-school programmes to help

QUESTION 1: TIMED ACCURACY TEST (CONTINUED)

develop and instil these qualities in the lives of student athletes. I believe school sport programmes must have a few components in place for this to happen.

The first thing they need is a good team of coaches who understand the big responsibility that is placed upon their shoulders. They help shape and prepare these student athletes not only for sport, but for their everyday lives. Yes, I did say coaches, because it is a responsibility that lies on the shoulders of more than one person. The help of more than one person is necessary to lead these student athletes to success.

The second component also involves the coaches: It is the ability to capture the admiration and the trust of the athletes. This is crucial because if you can capture a person's admiration and trust you can motivate them to perform at a higher level not only in sport, but also in their own lives. If you can get the athletes to believe in you and your philosophies, you can begin to see significant changes in grades and behaviour. It all starts with coaches who have a plan and methodology behind the principles they are teaching. As I said earlier, there is a big responsibility on the coaches to help young student athletes make a smooth transition into society.

QUESTION 1: TIMED ACCURACY TEST (CONTINUED)

The third, and I believe the most crucial of all, is the support that comes from the community and administration. This is very important, because student athletes need to know they are appreciated and there is no better way for the community and administrators to show that appreciation than to get involved in youth athletics. To accomplish this is going to take valuable 50 wpm investments in the form of money and time. The more invested, the better the results. I can attest that there is no greater investment than the future of our young student athletes. When these things are in place, I believe student athletes/_____ 55 wpm
